SKILLS

Frontend

React Next.js

TypeScript JavaScript

Tailwind CSS

Framer Motion

HTML5/CSS3

Backend & Tools

Node.js Express.js

MongoDB Redis

REST APIs JWT Auth

Git / GitHub Vercel

EDUCATION

Bachelor of Engineering
(B.Eng.)
Lagos, Nigeria

Akinkunmi Adeyinka

Frontend Engineer

Passionate and detail-oriented Frontend Engineer with over 3 years of experience specializing in React, Next.js, and TypeScript. Adept at designing and building highly responsive, accessible, and scalable web applications that bridge creative concepts and functional performance. Focused on implementing clean codebase structures, state management architectures, and premium, interactive user interfaces to optimize user engagement and performance metrics.

SELECTED PROJECTS

RSS Feed Reader snowwolfrssfeed.vercel.app

Next.js, TypeScript, Tailwind, Zustand, Redis, Crypto-JS

Developed a modern, feature-rich RSS feed reader built from scratch, providing seamless subscription management and content consumption.

- Engineered full-stack features using Next.js, Zustand for global state management, and Redis for caching.
- Designed and implemented user authentication via JWT and client-side end-to-end encryption/decryption using crypto-js.
- Built a premium, responsive UI featuring real-time read/unread article tracking.

AI Coding Agent [React, OpenAI API, TypeScript, Express, Web Workers](#)

Created an interactive, browser-based AI coding assistant capable of autonomously writing and editing project files.

- Developed streaming responses using Server-Sent Events (SSE) to display code generation in real time.
- Architected robust asynchronous state management utilizing custom React hooks and references.
- Designed sandboxed code execution environments inside Web Workers, allowing safe in-browser script testing.
- Optimized model prompt structures and token consumption, lowering API overhead and latencies.

Stock Inventory Management System stock-management-main.vercel.app

Next.js, TypeScript, Tailwind, Zustand, MongoDB, REST APIs, JWT Auth

Built a comprehensive stock inventory and order tracking solution tailored to streamline warehouse operations and analytics.

- Structured order flow pipelines with real-time data polling using REST APIs and secure role-based JWT authentication.
- Crafted a responsive dashboard with CSS Grid and Flexbox, providing quick accessibility to stock metrics.
- Wrote optimized MongoDB aggregation pipelines to process inventory levels and sales data into analytics.
